

Protocol for Adding Small NVWT.org Signs to Existing Historical Markers

If you are aware of a site on The National Votes for Women Trail that was already identified with a historical marker and you want to indicate its connection to The National Votes for Women Trail, small signs (like the one in the right hand corner of the Pomeroy Marker below) will be able to be created in an appropriate color scheme. These signs will be available, pending a review process, in 2021. A good quality photo of the marker will be necessary for color matching purposes. Stay tuned for more details on where and how to submit your requests.
